

Activity Card

“Gravity & Air Pressure”

OUTCOME: To demonstrate how gravity and air pressure affect falling objects.

- PROCEDURE:**
1. Crumple one sheet of paper into a ball.
 2. Stand and hold the paper ball in one hand and the sheet of paper in the other hand.
 3. Hold your hands at the same height and drop the papers at the same time.
 4. Record observations.

MATERIALS NEEDED: try different kinds of papers
